

The FAA Safety Team presents:

Mastering the Art of Instrument Navigation

Safe instrument flying is a matter of mitigating risk, personal minimums and standard operating procedures. If you have and use sound judgment, establish personal minimums and good procedures, you can enjoy a long and successful career of instrument flying. However, the training program that you employ can make the difference between success or failure in your instrument flying endeavors. IMC Club, through its nationwide chapters, provides organized "hangar flying" focused on building proficiency in instrument flying. Believing that safety and proficiency are developed through education and experience. Monthly meetings use real world scenarios to engage our members and allow them to share and build their experience. At this meeting we will introduce attendees to Scenario Based Learning. You do not have to be instrument rated to attend. Click on the link below to register TODAY!

Directions: Please see map link for driving directions.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
